

# KMJ Optical ERP 2.0

## Product Requirements Document (PRD)

### Product Name

KMJ Optical ERP

### Vision

Build a modern, cloud-based Optical ERP and Customer Relationship Management system to replace the existing legacy PHP application.

The system must preserve historical customer records, prescription history, visit history, billing information, delivery records, and inventory while providing a significantly faster and more user-friendly experience.

The application will be used daily by KMJ Optical staff across multiple shop locations.

---

## Primary Objectives

1. Centralize all customer data.
  2. Preserve prescription history permanently.
  3. Track eye power changes over years.
  4. Simplify customer visits.
  5. Simplify billing.
  6. Simplify delivery tracking.
  7. Manage inventory.
  8. Generate business insights.
  9. Support future WhatsApp automation.
  10. Support migration of 10,000+ historical customers.
- 

## User Roles

Current Version:

Single Role System

Role: Owner / Operator

Future: Multi-role support may be added later.

---

## Core Modules

1. Dashboard
  2. Customers
  3. Visits
  4. Prescriptions
  5. Orders
  6. Billing
  7. Payments
  8. Delivery
  9. Inventory
  10. Reports
  11. Settings
  12. Data Migration
- 

## Customer Management

### Customer Fields

Customer ID (Auto Generated) Name Age Gender Mobile Number Alternate Mobile Address City Shop Notes  
Tags Created Date Updated Date

### Capabilities

Create Customer Edit Customer Search Customer Merge Duplicate Customers View Customer Timeline View  
Prescription History View Billing History View Payment History View Order History
